### ABSTRACT:-

In the field of research, innovative and creative research papers are necessary. To write and publish such types of research papers in journals at National and International level, it must be qualitative. For that purpose proper guidance to the researcher and writer is very must. The present paper is focused on how to write quality research papers.

**KEYWORDS:** researcher and writer , knowledge creation , Survey Method .

### INTRODUCTION:

Format of research paper should consist of the following points are generally necessary for writing a quality research papers

- i) Abstract and keywords.
- ii) Introduction.
- iii) Objectives of the research study
- iv) Research procedure
- v) Educational implication
- vi) Conclusions or Major findings
- vii) References

Apart from these points some points are very necessary to find out which gives quality to the research papers. Here researcher tried to find out the best criteria about how to write the research papers.

Now days it is very necessary in the era of these fast emerging changes, there is need for future global educators with qualities and competencies in global perspective. Researcher should believe in knowledge creation, through high quality research and development. Hence newcomers i.e. P.G. students in the field of education should know how to publish research work? What should be the criteria for publication of research paper so the present research paper is based on this theme and aimed to find out what should be the best criterion for the writing research papers and for publishing it?

### 2.STATEMENT OF THE PROBLEM

#### STUDY OF THE EVALUATION CRITERION FOR THE SELECTION OF THE PUBLICATION OF THE RESEARCH PAPERS

### 3.OBJECTIVES

- 1) To study the views of experts about quality research paper.
- 2) To find out the best criteria for publication of research paper.
- 3) To conclude major criteria for publication of research paper.

4) To suggest the good evaluation criteria for the selection of the quality research papers.

#### 4. METHODOLOGY –

Researcher has used the Survey Method of research for the present research.

#### 5. RESEARCH TOOL –

Researcher used the Interview Schedule to collect the data as a research tool.

#### 6. SAMPLING METHOD –

Purposive sampling method is selected. The following 10 experts from Aurangabad University affiliated colleges are selected.

#### 7. RESEARCH PROCEDURE

Interview Schedule is made and sent to all experts through their mail address. They are asked to fill and give response by e-mail. Researcher received 8 responses, 2 responses are through mobile phone.

#### 8. ANALYSIS AND INTERPRETATION OF DATA

Researcher analyzes the data using percentage of response given by experts.

Percentage of Response for the Statements Stated in Interview Schedule

- 1] Ninety percentage experts agree with that Paper can be accepted in any one language from Marathi, Hindi and English.
- 2] Most of the experts said that Abstract and keywords should be accompanied with full paper. It should be written on single page
- 3] Reports of new developments and innovations is added
- 4] Reference should be in APA style
- 5] Declaration for originality should be attached
- 6] In short it should contain abstract, keywords, title, theoretical background, objectives, major discussion, conclusion, educational implication and references
- 7] It should be researchers' own creation.
- 8] Preferably it should be in English language.
- 9] Title of the research should be relevant to the theme and sub-theme.
